

PATRONORUM REGNI SUECIE

Historia for the feast of the patron saints of Sweden (AH 28:42): sources with musical notation

Descriptions of sources in *Mittelalterliche Handschriften der Universitätsbibliothek Uppsala. Katalog über die C-Sammlung* and in the computer database "Medeltida pergamentomslag" (MPO) in the National Archives (*Riksarkivet*), Stockholm.

Codices

Skara, Skara stifts- och landsbibliotek [S-SK]

Skara music manuscript nr 1. Antiphoner, S. 16:1

The chants complete with notation. Hymns in the hymnary section.

Finland

Vörå, kyrkoarkivet (Parish archives)

Antifoner from Vörå. S. 16 m (c. 1535)

All chants, except hymns and responsory verses, with notation. *Iocundare mater* is *antiphona sola* in first Vespers. Especially the texts of the chants are very difficult to decipher at places, but the versions seem very close to those of the Bygdeå manuscript. The second and third antiphons in Lauds (fol. 92r and 91r) are confused.

A reservation against possible mistakes in the transcription must be made because the photo copy, made when I saw this source 12 years ago, is very indistinct.

After the reformation some emendations in the chant texts have been made. Lit.: Schalin, source nr. 25.
